

B IDs for Card Categories

The following card category IDs are currently defined. The "name" corresponds to the card names in the operator dialogue on the FEP. The ISO prefix is given for new cards and will be completed in the future.

ZVT-H will assign a card type ID and designation for new card types upon request.

The network operators may, for various purposes, also have issued pseudo card types which do not have a card type ID but only a designation (e.g. due to multi-merchant). As the designations are used in the card profile master data, it is important that network operators inform ZVT-H of the pseudo card types they use to avoid any collisions with the designations of new card types.

Card type ID	Name	Card	ISO Prefix
0 / X'0000'	ECMAGN /GIROCD	German girocard	
1 / X'0001'	EUROCD	MasterCard	
2 / X'0002'	AMEXCO	American Express
